

Executive Summary

The **Ferns and Petals (FNP) Sales Analysis Dashboard** was developed to analyze sales performance, customer purchasing behavior, product demand, and operational efficiency using transactional order data from 2023. The dashboard provides business stakeholders with an interactive overview of key performance indicators (KPIs) and enables data-driven decision-making through dynamic filters for **Order Date**, **Delivery Date**, and **Occasion**.

Business Overview

The analysis reveals that the business generated **₹35.21 lakh** in revenue from **1,000 orders**, with customers spending an average of **₹3,520.98 per order**. The average order-to-delivery time is **5.53 days**, indicating a relatively efficient fulfillment process while highlighting opportunities for further logistics optimization.

Key Insights

- **Revenue Performance**
 - Total Revenue: **₹35,20,984**
 - Total Orders: **1,000**
 - Average Customer Spend: **₹3,520.98**
 - Average Delivery Time: **5.53 days**
- **Occasion-Based Sales**
 - **Anniversary** and **Raksha Bandhan** generated the highest revenue among all occasions.
 - **Valentine's Day** and **Diwali** contributed comparatively lower sales, suggesting opportunities for stronger promotional campaigns during these events.
- **Category Performance**

- **Colors, Soft Toys, and Sweets** emerged as the highest revenue-generating product categories.
- Categories such as **Plants** and **Mugs** contributed significantly less revenue and may require pricing, bundling, or marketing improvements.
- **Monthly Sales Trends**
 - Revenue peaked during **February** and **August**, aligning with major gifting occasions and seasonal demand.
 - Sales declined during several off-season months, indicating potential opportunities for targeted marketing initiatives to stabilize revenue throughout the year.
- **Top Products**
 - The **Magnum Set** generated the highest revenue, followed closely by **Quia Gift, Dolores Gift, Harum Pack, and Deserunt Box**.
 - These products represent the company's strongest-performing offerings and should receive continued promotional focus and inventory prioritization.
- **Geographical Analysis**
 - **Imphal, Dhanbad, and Kavali** recorded the highest order volumes.
 - Understanding customer preferences in these high-performing cities can support regional marketing strategies and inventory planning.
- **Order Time Analysis**
 - Revenue varied across different hours of the day, with noticeable peaks during evening hours, suggesting that customer purchasing activity increases later in the day.
 - These insights can be leveraged to schedule promotions and digital advertising during peak purchasing periods.

Business Value

This dashboard transforms raw transactional data into actionable business intelligence by enabling management to:

- Monitor overall business performance through real-time KPIs.
- Identify high-performing occasions, products, and categories.
- Understand seasonal purchasing trends and customer spending behavior.
- Optimize inventory planning and promotional strategies.
- Improve delivery performance and customer satisfaction.
- Support strategic decision-making through interactive data exploration.

Overall, the dashboard serves as a comprehensive executive reporting solution that helps FNP identify growth opportunities, improve operational efficiency, and maximize revenue through data-driven insights.
